

## Indications to forward.

Before the requests on how to forward that I receive, here I present some elementary indications to do it in the best way.

### Forward:

1.- I always send with my name, it seems the most appropriate. However, you can do it with a pseudonym by opening a specific account for this matter reserving privacy. If you prefer, do it with your name. It is convenient to use a VPN system.

2.- Take several words, looking for synonyms, to vary the title of the Message, and forward packets of less than 20 addresses.

3.- If you do so from the received Message, it is advisable to remove the automatic forwarding data. Such data is not necessary and, especially if there are several forwardings linked together, they complicate the beginning of the reading of the Message.

4.- You don't have to forward to your contacts, although you want. Search for new addresses on the Internet, that's what they're for.

5.- You can also resend by copying the Message of the PDF document on this page, above, the first document. Make sure, in any case, that the indication that it is a forwarding appears in the title, and put the image at the end.

### Responses:

I receive few responses. On the one hand, the thing is impressive and, in principle, it is not known how to act before the Message. On the other, everything is very clear.

There are three types of response.

1.- Make a comment or question.

In this case you can answer: "Questions and comments to the author, thank you. In [www.nuevaera.info](http://www.nuevaera.info)".

Or answer what you want to answer.

2.- Requests for indications to forward.

Refer these people to [www.nuevaera.info](http://www.nuevaera.info) and to this particular document.

3.- Any derogatory comment and/or one that evades the content without presenting questions, comments or arguments. This happens very rarely. In this case the answer is:

You're welcome, you're welcome. Yes, so much time to find out, but here we are, a person has found it. How to imagine that nobody believe they are immortal, and that they refuse to live to be all powerful? How to imagine so much evil? Sure, we've all always known. And how wonderful to know what the human problem is, right?

Supertramp already said it in their magnificent song "Two of us".

When is man going to find out?  
When are we going to find out?  
What the universe is just waiting to hear.

Thanks to you, really, thank you very much.

Happy Paradise, buddy.  
Remember [www.nuevaera.info](http://www.nuevaera.info)

And if he or she insists on his or her attitude.

Hey, do you know where hang bridges hang from?

This makes sense because, like suspension bridges, human ideas do not hang from Heaven, but are supported on the ground. With this she or he will no longer respond, she or he will be thoughtful.

You can also simply not respond. That to your liking. My email address is on the web, they can always ask or comment directly.

And so that the legality of sending and forwarding the Message is clear, read, and send where appropriate, the following:

*Article 19 Human Rights.*

*Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.*

On the other hand, the scope of the Message is total, no one tells you that it is not appropriate to send it to a certain address, since the Message is of work, professional, academic, leisure interest... of any concept. It encompasses all Existence.

-----/

The Message is written in two languages, Spanish and English. I just don't know enough other languages. If you want to translate it into another language, go ahead. Please, make sure the translation is correct and true.

I hope these indications are useful to you. In any case, you can write to me and ask any questions or comments. You have my email address on the INICIO page. Thanks for your attention. A greeting.

Jesús Estrada.
